

GG GRAND JUNCTION®

High Profile Fifth Wheels

• Distinctive Style • First Class Elegance • Unsurpassed Value

Residential Features with Premium Components

34QRE in Pralines & Cream décor and Mesa Oak cabinetry shown with optional fireplace, "Ultra-leather" recliners, granite counter tops and 12 cu.ft. 4 door side-by-side refrigerator.

GRAND JUNCTION

Step into *Grand Junction* and experience the ultimate in sophistication and luxury, featuring arched, glazed hardwood cabinet doors and frames, solid surface counter tops and residential furnishings.

Grand Junction is the new standard in style, features and function.

All *Grand Junction* models feature solid hardwood doors and cabinet stiles (frames)*.

*See page 4 Competitive Advantages for details.

Grand Junction solid wood cabinetry is available in two glazed, stained finishes oak or cherry.

Mesa Oak

Canyon Cherry
(Optional)

MOR/Ryde Suspension System

Grand Junction provides the MOR/Ryde Equalizer Suspension System and Rubber Shear-Spring Pin Box as standard features. The systems work in unison to create the smoothest ride possible in a fifth wheel.

The MOR/Ryde suspension system uses rubber shear springs that work in concert with the steel leaf springs. The rubber shear spring replaces the leaf spring equalizer. The MOR/Ryde system will lower the spring rate providing

for almost double the axle travel of traditional systems. Increased axle travel translates into a smoother ride which protects your RV from jarring caused by rough roads.

The MOR/Ryde Rubber Shear-Spring Pin Box incorporates a rubber shear spring that works both longitudinally and

laterally to diminish the back and forth 'chucking' motion that occurs between the tow vehicle and RV. This means a more comfortable ride for the driver and passengers. Plus, it reduces stress on the fifth wheel frame and helps prevent damage that can occur from rough towing.

MOR/Ryde Equalizer

Competitor's Equalizer

The Competition

Most competitors still use a steel pivoting equalizer and standard pin box which **does not** provide the level of shock absorption and damage protection of the MOR/Ryde system.

Protect your investment and enjoy the ride the with MOR/Ryde system.

Competitive Advantages

Grand Junction's Stacked Rail Chassis Design

Grand Junction prides itself on having the best storage system possible in a fifth wheel.

That's why we use a stacked rail chassis design. This chassis

design uses double I-beam frame rails to increase the amount of storage space under the bath/bedroom deck. Many models feature an amazing 125 cubic feet of storage – almost 60% more than the competition!

Plus the design of the frame includes a wide stance front jack system. The jacks are placed almost 9" further apart than the competition which increases stability and prevents unwanted body movement when parked.

The Competition

The competition still uses the traditional straight rail fifth wheel chassis that restricts storage space. Their jacks are mounted closer to the center of the chassis making it less stable.

Grand Junction - superior storage and stability

6'7" Bedroom Height at Front Cabinet

More space in the bedroom includes more headroom too! *Grand Junction's* front wall and roof line allows for added headroom in the bedroom - a full 6' 7" tall at the front storage cabinet!

Most competitors' headroom decreases from the center of the bedroom to the front wall. Some are as low as 5'8" tall.

Grand Junction - more storage, more height, more comfort

Solid Hardwood Doors & Cabinets

Grand Junction's Hardwood Stiles, Slot & Screw Construction

Competitors Lumbercore Stiles, Staple Construction

Grand Junction features solid ash cabinet stiles/frame, hardwood cabinet doors, drawers and slide room fascias. The wood is stained to match the solid hardwood cabinet stiles.

Many competitors use less expensive, vinyl wrapped MDF fiberboard or lumbercore stiles and slide room fascias. Additionally, many add veneer inserts to their doors and vinyl wrap their stiles to reduce cost.

Hardwood doors, stiles and fascias will retain their factory new appearance for years. The competitions less expensive construction may swell and delaminate over time.

Grand Junction - which would you rather own, real or made to look real?

Soft Touch Ceiling Liner

Attention to detail makes all the difference when you are choosing your next recreational vehicle. On top of all of the other features that make *Grand Junction* special, we have even looked at ways to improve the ceiling liner.

Grand Junction includes a soft-touch ceiling liner. Usually only found in high end motor homes, *Grand Junction* includes this feature as a standard item.

The soft-touch ceiling liner is stylish vinyl layer that is laminated to 1/2" foam and a 1/8" wood backer. The ceiling liner has a great look, plus it reduces sound levels and adds another layer of insulation to your fifth wheel.

The competition uses a white panel board with nailed batten strips at the seams – every 4'. Ceiling paneling may work loose over time and does not provide the look or insulation value *Grand Junction's* soft touch ceiling provides.

Grand Junction - you can see, feel and hear the difference!

Entry Steps

Grand Junction's XL, 10" Deep Entry Steps

Competitors 8" Deep Steps

Grand Junction's entry steps are a full 10" deep and include two anti-slip strips per step. Plus the corners are rounded for added safety.

Most competitors use only 8" deep, square corner steps.

Your safety is important to *Grand Junction*.

Grand Junction - designed for safety

Steel Ball Bearing Drawer Glides

Grand Junction's stainless steel ball bearing drawer hardware is designed for years of rigorous use. The drawer glides are designed to open easily under a full load and include a drawer stop feature to prevent drawers from opening during travel. The hardware is mounted on the sides of the drawers and is screwed to solid wood drawer sides.

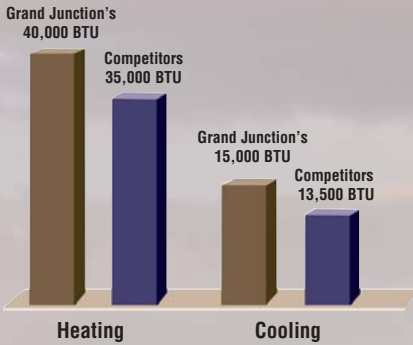

Many competitors use single plastic or combination plastic and metal drawer glides mounted on the bottom of the drawer. Check out the competitions drawer sides. – Are they real wood?

Grand Junction - premium, quality features

Premium Appliances & Utilities

Heating and Cooling Systems

Heating: *Grand Junction* will keep you warm on those chilly evenings with a standard 40,000 BTU forced air furnace. Most competitors only offer a 35,000 BTU furnace.

Cooling: *Grand Junction* features a standard 15,000 BTU roof air conditioner with a quick cool feature. It's easy to use and cools your RV more efficiently than the competitions 13,500 BTU roof air.

Grand Junction - warmer, cooler – better!

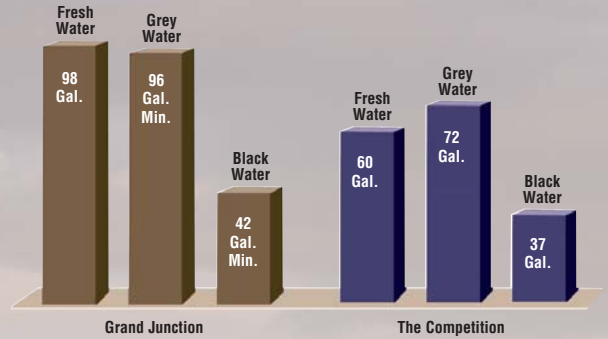

12 Gal. Water Heater

Grand Junction's standard 12 gallon, quick recovery water heater allows for longer showers.

Don't settle for the competition's smaller 6 or 10 gallon water heater.

Large Fresh Water & Waste Water Tanks

Anyone who has owned RV's in the past knows that large tank sizes are critical. That's why *Grand Junction* uses a 98 gallon fresh water tank, 42 gallon black water tank and dual 48 gallon grey water tanks – some models even feature a third 48 gallon grey water tank!

Add *Grand Junction's* standard 12 gallon hot water heater to the equation and you will find that the *Grand Junction* has one of the largest water storage systems available in the market today. (See model information for specific tanks sizes)

40% more Fresh Water capacity – 20% more Black Water capacity and 20% more Grey Water Capacity – The Grand Junction Advantage

Sealed Burner Oven & Half-Time Convection Microwave

Grand Junction is designed for enhanced livability by providing you with the industry's most advanced products as standard features. Our 22" *Amana* oven is larger than most competitors' 19" oven, plus the 3-burner cook top features a sealed burner with wire pan rack and range cover.

Grand Junction also features a large 1.3 cu.ft. *Half-Time* convection microwave that operates like a standard microwave or convection oven. Both features can be used together to greatly reduce cooking time. More importantly, the microwave is a residential-style "over the range" appliance with an integrated exhaust fan that is vented to the outside.

Many competitors use a 19" oven with an open burner cook top. These conventional cook tops have openings that allow food and crumbs to fall between the top and the oven, making them difficult to clean. Plus, the competition uses a 1 cu.ft. microwave that is built into the overhead cabinets and requires a separate exhaust fan that robs your galley of usable space, lifting the appliance to a height that is uncomfortable and dangerous for most users.

Premium appliances - enhanced livability

Solid Surface Residential Counter Tops

Nothing says class and elegance in a kitchen like solid surface counter tops. *Grand Junction's* solid surface counter tops are the ultimate in style and function. Each counter top is 1/2" thick and is handmade to fit your vehicle to assure many years of durable use and classic beauty.

Grand Junction is also available with optional granite counter tops for added elegance.

Many competitors use laminate counter tops that are glued to 1/4" particleboard backers or a fiberglass base with 1/16" of sprayed acrylic. Try running your fingers along the edge, be careful!

Which type of countertop would you rather have?

Standard Solid Surface Countertops

Optional Granite Countertops

Premium Residential Lighting

Grand Junction features premium residential lighting as a standard feature. From the oil-rubbed bronze dual pendant dinette light to the standard reading lamps and fluorescent lighting in the galley, *Grand Junction* provides stylish lighting that you need after dark. Plus, *Grand Junction* features "puck style" recessed halogen lights. This new innovation spreads even amounts of natural daylight-style lighting throughout your coach. You will love the glow of these lights.

Don't settle for the competition's old fashioned "pancake" lights!

Limited Warranty • Two years structural and appliance • One year hitch to bumper • See owners manual for more information

Vehicle loading - Every effort has been made to provide the greatest number of options for the recreational vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreational vehicle.
 Some optional equipment not included. Net carrying capacity (NCC) is determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options and cargo. Liquid capacities and weights are approximations only. Warning - This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing and towing instructions. *UVW and Hitch Dry Weight are base weights of units without options. Each unit includes a weight label which lists specific weight information for that unit.
 Product information, specifications, and photography in this brochure were as accurate as possible at time of printing. Photographs may contain some features that are optional on your vehicle. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada. Vehicles are designed for recreational use only and not intended for use as a primary residence. All product brand names used in this brochure are registered trademarks of Thor Industries Inc.
